#### ING POSITION

ck of the circle , right edian axis of the et stance wider oulder width– Feet "10h10" - Upright on – Little flexion

ktended in er on to the rarms line is

pening of the left side (Left arm-Left knee –Left foot)" like a door" on the same vertical plane - Body weight transfer to the left - Left arm not aggressive but VERY wide forward and left - Right knee pushed forward -Knee well apart – Pivot on ball of the left foot – Perfect "T" position.
